Sales Management

Cloud Billing Manager simplifies sales operations, improves invoicing efficiency, and provides complete visibility into every customer transaction.

- **Quick Sales Invoice Creation –** Create professional sales invoices within seconds using an intuitive and streamlined interface.
- **Cash Sales Invoices** – Instantly generate invoices for walk-in or cash customers.
- **One-Click Invoice Duplication –** Copy previous invoices to save time for customers with recurring orders.
- **Profit Margin Analysis –** View estimated profit and margin while preparing sales invoices to support better pricing decisions.
- **Load & Weight –** Record product quantities, and loading information directly within the invoice.
- **Customer-Specific Pricing –** Configure customer-wise pricing, discounts, promotions, and contract rates.
- **Assign Vehicle & Driver –** Allocate delivery vehicles and drivers directly from the sales invoice
- **Generate Loading Slips** – Automatically prepare loading slips for warehouse staff to ensure accurate order picking and vehicle loading.
- **Auto Invoice Generation –** Automatically generate recurring invoices based on daily, weekly, monthly, or custom schedules.
- **Draft & Unposted Invoice Workflow** – Prepare, review, edit, and approve invoices before posting them to customer accounts.
- **Invoice Printing & PDF Generation** – Print or email professionally branded invoices in PDF format.
- **Multiple Invoice Templates** – Support multiple invoice layouts tailored to individual customer requirements.
- **Quotations & Price Offers** – Create quotations and instantly convert approved quotations into sales invoices.
- **Sales Order Management** – Manage the complete sales order lifecycle from quotation to final delivery.

Sales Management
unique selling point (USP)

Intelligent Customer Pricing Engine

- **Automatic Customer-Specific Pricing** – The system intelligently applies customer-specific product prices based on previous orders, pricing history, or predefined pricing agreements, eliminating manual price selection.
- **Smart Price Learning** – When processing a customer's first order, the selected product prices can be automatically saved and reused for future orders, creating personalized pricing profiles for each customer.
- **Order History Price Recall** – During invoice creation, the system automatically retrieves the last selling price or historical pricing for each product supplied to that customer.
- **Customer-Wise Product Pricing** – Configure individual selling prices for each product against each customer, supporting contract pricing, negotiated rates, promotional pricing, and special discounts.
- **Intelligent Price Suggestions** – The system suggests the most appropriate selling price based on customer history, previous transactions, and existing pricing rules, ensuring consistency and reducing pricing errors.
- **Margin Protection** – Displays estimated profit and profit margin in real time before the invoice is finalized, helping sales teams maintain target profitability.
- **Complete Pricing History** – Maintain a full audit trail of pricing changes and customer-specific product pricing for future reference and reporting.

Customer Billing & Financial Management

Sales Returns & Credit Management

- **Credit Notes** – Issue full or partial credit notes against customer invoices.
- **Sales Returns Management** – Process returned products, automatically update inventory, and adjust customer accounts.
- **Invoice Amendments** – Reverse, cancel, delete or correct invoices

Customer Account Management

- **Customer Account Statements** – Generate detailed customer statements for any selected period.
- **Outstanding Balance Monitoring** – View customer balances and overdue invoices in real time.
- **Credit Limit Management** – Define customer credit limits and receive alerts before processing invoices that exceed approved limits.
- **Customer Payment History** – Access a complete record of customer payments and transactions.
- **Customer Invoice History** – View and search all previous invoices, quotations, credit notes, and sales history
- **Customer Advance Payments** – Collect advance payments or deposits from customers before invoices are generated.

Payment Management

- **Multiple Payment Methods** – Accept Cash, Card, Bank Transfer, Cheque, and Other Payments.
- **Payment Reversal** – Reverse incorrect or cancelled customer payments
- **Invoice Aging Analysis** – Identify overdue invoices, payment delays, and outstanding amounts at a glance.
- **Payment Allocation** – Settle multiple invoices in one transaction.
- **Customer Ledger Integration** – Every payment is automatically reflected in the customer ledger
- **Customer VAT** – Calculate VAT automatically based on UK tax rules or from system settings.

Purchase Order Management

Cloud Billing Manager provides complete control over the entire procurement lifecycle

- **Quick Purchase Order Creation** – Generate purchase orders in seconds using supplier-specific product pricing and purchasing history.
- **Purchase Payment Tracking** – Record purchases as **Paid**, **Partially Paid**, or **Due**, with complete outstanding balance monitoring.
- **Email Purchase Orders** – Send purchase orders directly to suppliers via email in PDF format, eliminating manual paperwork.
- **Purchase Order Summary** – View complete order details, payment status, delivery status, and supplier information from a single screen.
- **Purchase Order Verification** – Verify quantities, pricing, discounts, VAT, and supplier information before confirming the order.
- **Recurring Purchase Orders** – Automatically generate purchase orders for regularly stocked or frequently ordered products.
- **Automatic Inventory Update** – Stock levels are updated instantly once goods are received and verified.
- **Stock Verification** – Compare received quantities against purchase orders and supplier invoices to ensure accuracy.
- **Batch & Lot Tracking** – Record batch numbers, expiry dates, and manufacturing details
- **Inventory Cost Update** – Automatically update inventory valuation based on the latest purchase costs.
- **Fully integrated** – with Inventory, Warehouse, Supplier Management and Accounting

Supplier Payments & Financial Management

- **Supplier Invoice Payments** – Record and manage payments against supplier invoices.
- **Bulk Supplier Payments** – Process payments for multiple supplier invoices in a single transaction, saving time and reducing manual work.
- **Full & Partial Payments** – Support complete or partial settlement of supplier invoices.
- **Outstanding Payables** – Monitor supplier balances, overdue invoices, and pending payments in real time.
- **Multiple Payment Methods** – Support Cash, Bank Transfer, Cheque, Card, and other payment methods.
- **Payment Allocation** – Allocate one payment across multiple invoices or settle multiple invoices simultaneously.
- **Supplier Credit Notes** – Process supplier credit notes and automatically adjust outstanding balances.

Supplier Financial Management

- **Supplier Account Statements** – Generate detailed supplier statements for any selected period.
- **Supplier Ledger** – Maintain a complete ledger of purchases, payments, credit notes, and outstanding balances.
- **Supplier Transaction History** – View complete purchase and payment history for every supplier.
